- Customisable home screen with personal shortcuts and favourites
- Smart software solutions that optimise office efficiency

Designed to make life easier

Smart answers to tough challenges

Intuitive operation panel

An easily customisable operation panel displays your personal home screen with your own preferences and settings. The home button brings you back to the home screen. An integrated USB/SD slot lets you work directly from an external source. At the same time, individual ergonomics are secured with the tiltable panel.

Enhanced internal controller

Quota Settings per user group or user allow you to manage the operation costs of the device. Combining high throughput with sustainability, the controller also features an Eco-Friendly indicator that shows the paper settings history for more efficient usage. The USB/SD slot permits the easy printing of PDF, JPEG and TIFF files.

Advanced fusing system

Less creases and wrinkles when printing out envelopes, due to the advanced fusing system. Environmentally-conscious, the fusing system supports a lower recovery time from sleep-mode to operation. Adding to lower TEC (typical electricity consumption) values, which also means less impact on the environment.

Maximum security

Passwords and user authentication prevent unauthorized printing or copying of documents. CC Certification, PDF/A information security and electronic document archiving standards further safeguard your documents. While enhanced encryption levels enhance the level of device security.

MFPs that adapt to your needs

Looking good, working well

Elegant design with contrasting white-grey colour scheme and tasteful cube-form finish. Intuitive interface, stylish graphics and tiltable operation panel. MFPs that are functional, attractive and stylish.

Professional inline finishing

Truly professional looking printing. Produce a portfolio of attractively-finished documents, with up to 1,000 sheet booklet and staple finishers. Add a punch unit to prepare sheet documents or booklets for insertion in binders. No more outsourcing reports, presentations or other essential documents.
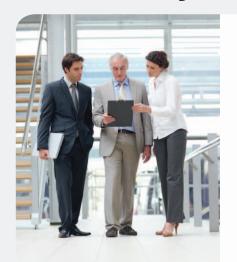

Smart software

GlobalScan NX provides intelligent scanning options, with simple buttons to scan directly to the desired location using predetermined formats. @Remote, which uses operational data that helps you to manage your output devices more efficiently. And no more running out of toner: your device reorders automatically! Small benefits that make a big difference.

Discover your hidden savings

Save time, save money

30-35 colour prints per minute gets the job done quickly. A generous paper tray, duplex printing and automatic document feeder speed up bigger jobs. Enhanced Media Print lets you preview jobs, and print PDF, JPEG and TIFF files from a USB stick with just a touch of the screen. So you avoid costly mistakes when keying in jobs.

Indirect savings with a direct impact

The print quota management system cuts back unnecessary paper usage, reducing your energy bill. Remote Fax allows multiple users to send and receive faxes on a single network, removing the cost of maintaining multiple fax lines.

Smart, speedy and green

They multi-task so you don't have to

MFPs that work with you to make routine jobs easier. Like the automatic Job Promoter that skips a job for which there is insufficient paper and prints the next job. There's also colour scanning to email, FTP, SMB, NCP, USB/SD or URL, which simplifies a host of routine office tasks.

Go with the workflow

Jobs are clearly separated by a Banner page with useful output summary. Prioritise tasks direct from the by-pass tray. Schedule Printing to happen outside peak times or overnight. The Browser Unit option makes it easy to print timetables, tickets and manuals directly from the internet.

Environmentally responsible

Gestetner products have eco-friendly and money saving features such as fast duplex printing and copying, ultra low sleep mode and increased toner yield. This saves paper, time and energy, while reducing waste and costs. Gestetner products are also Energy Star compliant, which means less energy is needed to run your Gestetner device.
